To,  
Mr. Curt Nordal / Sigler HVAC Distribution,  
15<sup>th</sup> Feb 2021,

Dear sir,

Hope you are doing well. I am Rushikesh, Mechanical engineer working in the MEP industry for past 3 years. I have completed my Master's degree from New York University. After graduation, I worked on different types of commercial projects where I designed HVAC systems and produced code compliant construction documents.

I was very excited to know about the opportunity at Sigler Inc. I am currently located in Union City NJ, however with correct job profile and future growth prospects I am more than willing to relocate to the job's location while keeping in mind that there may be no relocation assistance.

I believe I am a good fit for the project engineer position as I have successfully completed more than one commercial projects by producing HVAC system design documents at every stage of the project. I have worked on Residential, Office spaces, Retail fitouts etc. I understand the importance of being able to use design tools efficiently such as Revit, AutoCAD MEP, Trace. I can confidently say that I have expert level knowledge of operating these tools to my advantage and expediate the production.

Along with designing, I have completed numerous site visits to understand the existing conditions, create an above ceiling punch list after construction etc. I am proud to say that I have taken initiative at my previous employer to make use of PlanGrid to make site visits much more efficient.

I would love to discuss in detail about my experience and how I was able to quickly come up with an optimal solution in difficult situations. I have attached my resume for your reference. I look forward to speaking at an interview with you.

Regards,  
Rushikesh Patil  
Mechanical Engineer
